**PATIENT JOURNEY DEL PAZIENTE MACULOPATICO**  
25 MAGGIO dalle 10:30 alle 13:00

RAZIONALE

La malattia e l'evoluzione della progressiva perdita della vista nella retina sono la maculopatia retinica e degenerativa senile (age-related maculopathy) e la forma più frequente di maculopatia, che colpisce 15 - 20 milioni di persone nel mondo occidentale. Se il caso diventa altro forma di maculopatia come quella diabetica le sue caratteristiche in rapporto all'aspetto della retina, diabete e all'aspetto del trattamento della malattia, possono variare profondamente. Quali sono gli sviluppi futuri della malattia e in che modo si può intervenire per far fronte a questi rischi? La risposta al tema di questi argomenti è stata data per primo nel 2011, con la pubblicazione di un libro di testo e l'edizione di un'opera di testo per gli studenti di medicina e odontoiatria e di un'opera di testo per gli studenti di medicina e odontoiatria.

**PATIENT JOURNEY DEL PAZIENTE MACULOPATICO**  
25 MAGGIO dalle 10:30 alle 13:00
