Sclerosi Multipla: diagnosi precoce, presa in carico precoce, trattamenti efficaci il più presto possibile. Così migliora la qualità di vita dei pazienti ...

Gli esperti non hanno dubbi: la SM, patologia che dal punto di vista economico impatta 5 miliardi di euro l'anno, si combatte coinvolgendo tutte le figure professionali, compresi gli infermieri il cui ruolo è fondamentale. Napoli 7 dicembre 2021 - La Sclerosi Multipla (SM) può esordire ad ogni età, ma è più comunemente diagnosticata nel giovane adulto tra i 20 e i 40 anni. Ci sono circa 2,5-3 milioni di persone con SM nel mondo, di cui 1,2 milioni in Europa e circa 130mila in Italia. Il numero di donne con SM è doppio rispetto a quello degli uomini, assumendo così le caratteristiche non solo di malattia giovanile, ma anche di malattia di genere. Esistono varie forme di malattia, ma la pratica clinica ha evidenziato come iniziare la terapia il più precocemente possibile porti a un rallentamento della progressione della disabilità, ricordando che ogni individuo richiede un programma di cura personalizzato. Al fine di sensibilizzare le istituzioni verso un trattamento precoce ed efficace della sclerosi multipla, Motore Sanità ha organizzato il sesto di 10 appuntamenti regionali dal titolo 'Focus Campania: #MULTIPLAYER - La Sclerosi Multipla si combatte in squadra'. Tante prestigiose autorità scientifiche sono intervenute sul tema. 'Iniziativa come queste sono molto importanti. Mi piace molto anche il titolo: affrontare questa patologia con il discorso di squadra e di rete, perché l'unione fa la forza, associata alla ricerca e al progresso', ha dichiarato a inizio dei lavori Antonio Postiglione, Direttore Generale per la Tutela della Salute e il Coordinamento del Sistema Sanitario Regionale. 'L'occasione di confronto con i diversi modelli organizzativi regionali è fondamentale, per capire le buone pratiche e per far sì che la squadra possa sempre lavorare meglio'. Ha parlato della dimensione del problema dal punto di vista economico Francesco S. Mennini, Professore di Economia Sanitaria e Economia Politica, Research Director - Economic Evaluation and HTA, CEIS, Università degli Studi di Roma 'Tor Vergata' e Presidente SIHTA: 'La SM è una patologia che impatta moltissimo: è stato calcolato un costo totale di 5 miliardi di euro, con un costo medio per persona di circa 40-45 mila euro all'anno. Il dato che a me ha sempre colpito molto, però, è quello relativo alla classe di età in cui viene
