SANITÀ. ESPERTI E POLITICI: QUADRO MALATTIE CAMBIATO, SERVE AGGIORNAMENTO LEA

(DIRE) Roma, 9 mag. - La definizione dei Livelli Essenziali di Assistenza (Lea) e delle relative tariffe?n percorso lungo, complesso e poco coerente con l'evoluzione rapida e dirompente delle tecnologie e delle conoscenze della medicina. Come se non bastasse, la loro applicazione continua a presentare diseguaglianze tra le diverse Regioni Italiane. Per questo motivo Motore Sanit?con il contributo incondizionato di Roche Diagnostics, ha organizzato l'evento dal titolo "I Lea e la ricerca di equilibrio tra i bisogni e la sostenibilit? per mettere a confronto i vari attori del sistema, al fine di arrivare a proposte utili e necessarie a un progressivo cambiamento e/o rivisitazione dei Livelli Essenziali di Assistenza. Ad aprire i lavori Tommaso Trenti, Presidente della Societ?Italiana di Medicina di Laboratorio-Biochimica Clinica e Biologia Molecolare Clinica (Sibioc), il quale ha evidenziato il fatto che la pandemia ha mostrato, ora come non mai, il valore della diagnostica di laboratorio nella sanit?uale insostituibile strumento di tutela della salute per tutti i cittadini. "SIBioC (Societ?taliana di - Medicina di Laboratorio-Biochimica Clinica e Biologia Molecolare Clinica), Societ?scientifica che rappresenta i professionisti del laboratorio clinico, medici, biologi, chimici e tecnici biomedici apprezza e approva la revisione dei Livelli Essenziali di Assistenza della diagnostica di laboratorio, legge che permetter? tutti i cittadini italiani, senza distinzione di residenza regionale, di fruire di nuove e efficaci prestazioni- continua Trenti- I nuovi Lea propongono un nuovo positivo processo dinamico di rivisitazione su base annuale dei contenuti dei Livelli Essenziali di Assistenza, eliminando gli esami divenuti obsoleti e inutili oltre a introdurne di nuovi. Tuttavia, Sibioc-Medicina di Laboratorio, pur condividendo le finalit?ha espresso preoccupazione per le conseguenze che potrebbe avere l'applicazione del tariffario dei nuovi Lea nella forma in cui?stato presentato alle Regioni. Tra i punti che pi?eoccupano c'?estrema contrazione delle risorse destinate alla diagnostica che mette a rischio la sostenibilit?ei servizi di Medicina di Laboratorio, la mancata valutazione del valore delle competenze professionali, i molti errori e incongruenza dei contenuti del decreto indubbiamente da rivedere".(SEGUE) (Comunicati/Dire)
