Vaccinazione contro herpes zoster e pneumococco: il Piemonte pensa a nuove azioni per aumentare l'adesione dei cittadini

By Media Intelligence 7 Luglio 2022

28 0

(Adnkronos) – Il Piano nazionale di prevenzione vaccinale (PNPV) fornisce un elenco dettagliato delle condizioni di salute per le quali risulta indicata l'immunizzazione. La Regione Piemonte ha messo a punto un protocollo vaccinale virtuoso valido sulla vaccinazione contro l'herpes zoster e pneumococco, rendendole gratuite per pazienti fragili e anziani. Attraverso questo protocollo si è trovato un accordo con la Società scientifica di diabetologia per fornire ai diabetici tutta una serie di vaccinazioni importanti e si sta lavorando, in maniera simile, per arrivare allo stesso obiettivo su altre cronicità. La Regione Piemonte si è impegnata, inoltre, in corsi di formazione con la Scuola piemontese di medicina generale "Massimo Ferrua" per i medici di medicina generale con l'obiettivo di spiegare l'importanza della vaccinazione e il corretto utilizzo del portale necessario per la registrazione delle vaccinazioni somministrate.
