Salute mentale: lo stigma ritarda la diagnosi, la presa in carico delle malattie psichiche e riduce l'aderenza alle terapie

17 Ottobre 2022 | Redazione Alessandria24.com | 122 Views | 6 min read

L'Emilia Romagna spende per la salute mentale il 3.6% del Fondo sanitario regionale, pari a 285 milioni di euro, mentre la spesa media nazionale è del 2,9%. Ma le conseguenze del persistere dello stigma, con stili di vita sbagliati e ritardo nell'accesso alle cure, incidono sulla durata della vita dei pazienti con disturbi psichici, che hanno una mortalità pe infarto e tumore 2,6 volte maggiore rispetto alla popolazione generale. Questi dati sono emersi dalla ricerca progettata dal Professor Domenico Berardi della Clinica Psichiatrica dell'Università di Bologna, realizzata in collaborazione con la Regione Emilia-Romagna, l'Università di Bologna e del sistema informativo regionale. La ricerca, iniziata nel 2008 e terminata nel 2018, ha coinvolto 200mila pazienti e ha evidenziato un'emergenza: i pazienti con disturbi psichiatrici hanno un'attesa di vita decisamente inferiore rispetto alla popolazione generale e si ammalano in particolare di patologie tumorali che sono addirittura correlate con i diversi quadri dei disturbi psichiatrici che gli specialisti trattano. L'utilizzo del sistema informativo ha consentito di ricavare il tasso di mortalità dei pazienti psichiatrici. Nelle altre regioni probabilmente non andrà meglio e tale preoccupante analisi mette in discussione il concetto di equità e universalità, principi fondanti del servizio sanitario nazionale. Se n'è parlato nell'evento "SALUTE MENTALE: COME SUPERARE LO STIGMA IN SANITÀ" organizzato da Motore Sanità con
